 Buenos Aires, Argentina

ABOUT ME

Fourth-year Computer Engineering student with a solid background in software development, automation, and artificial intelligence systems. I have experience in both academic research projects and professional development environments, combining programming, mathematical analysis, and teamwork. I am particularly interested in applying technology to solve complex problems and optimize processes in real-world and multidisciplinary contexts.

PROFESSIONAL EXPERIENCE

AI Developer

(Galo AI | March 2026 – Present)

- Design and deployment of production-ready AI agent workflows focused on operational automation, implementing strict validations, retries, and guardrails to ensure reliability.
- Implementation of advanced RAG (Retrieval-Augmented Generation) systems and structured outputs utilizing tool/function calling and dynamic JSON schema generation.
- Development of robust LLM evaluation pipelines and regression testing frameworks to minimize hallucinations and monitor prompt performance.
- Technologies:** Python, SQL, OpenAI/Anthropic APIs, RAG, Prompt Engineering, LLM Ops.

Backend Developer – AI Agents

(Push&Pop | August 2025 – December 2025)

- Development of artificial intelligence agents using Google ADK for automation and conversational assistance.
- Implementation of REST services with FastAPI and data persistence using PostgreSQL.
- Integration with messaging platforms (WhatsApp and Telegram) for multi-platform operation.
- Deployment and configuration of services on Azure.
- Technologies:** Python, FastAPI, Google ADK, PostgreSQL, WhatsApp API, Telegram API, Azure.

DevOps / Cloud Engineer

(Galo AI | June 2026 – Present)

- Optimized cloud storage architecture by reorganizing bucket structures and implementing signed URLs to ensure secure, time-limited file access.
- Led infrastructure migration from a monolithic single-server setup to a distributed three-server architecture, isolating monitoring services (Prometheus, Loki, Metabase) to eliminate Single Points of Failure (SPOF).
- Safeguarded data integrity by establishing a strict deployment pipeline, rigorously testing all architectural changes in a dedicated staging environment prior to production rollouts.
- Engineered custom Grafana dashboards to provide comprehensive, real-time observability into system performance and resource metrics.
- Resolved complex networking challenges by securely interlinking internal services across VPS environments using Cloudflare Tunnels (Zero Trust) and managing advanced DNS configurations.
- Technologies:** Prometheus, Loki, Grafana, Metabase, Cloudflare, VPS, DNS, Cloud Storage.

Full Stack Developer

(CodifyCo | September 2025 – March 2026)

- Development and maintenance of a high-concurrency platform with a large number of active users.
- Design and implementation of full stack features focused on scalability, performance, and quality.
- Diagnosis and resolution of production incidents (hotfixes, refactors, and structural improvements).
- Optimization of critical endpoints and operations, improving system response times.
- Work within agile methodologies, participating in analysis, development, testing, deployment, and post-release support.
- Technologies:** React, Next.js, NestJS, Prisma, PostgreSQL, Docker, Coolify, AWS.

ACADEMIC PROJECTS & ACTIVITIES

Buenos Aires Institute of Technology (ITBA) – Computer Engineering | 2022 – Present
Applied Software Development Courses (Udemy) – NestJS, Next.js, React, Docker | 2025 – Present
Technical Secondary School No. 7 “T.R.Q.” (IMPA) – Aeronautical Technician | 2015 – 2021
Digital Business Course (Udemy) – Sales and Customer Management | Oct 2023 – Dec 2023

INTERESTS & HOBBIES

Football Player • Miniature Trains • Applied Physics (Relativity & Electromagnetism)

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, Java, C, C#, HTML, CSS
Frontend & Mobile: React, Next.js, iOS Development, React Native
Backend: Node.js (Express, NestJS), FastAPI, Django, Java Spring Boot
Databases: PostgreSQL, MySQL, MongoDB, SQLite3, Prisma (ORM)
Cloud, DevOps & Tools: AWS, Azure, Docker, Git, GitHub, Maven
Testing & QA: Automated Testing (Unit, Integration, E2E), Jest, Cypress
Hardware: Arduino, ESP32, Raspberry Pi

LANGUAGES

English:
C1 (Advanced)

German:
B1 (Intermediate)

French:
A1 (Basic)
