ABOUT ME

Fourth-year Computer Engineering student with a solid background in software development, automation, and artificial intelligence systems. I have experience in both academic research projects and professional development environments, combining programming, mathematical analysis, and teamwork. I am particularly interested in applying technology to solve complex problems and optimize processes in real-world and multidisciplinary contexts.

PROFESSIONAL EXPERIENCE

Software Engineer

(Galo AI | Part-time | August 2026 – September 2026)

- Migrated infrastructure from a single server to a distributed three-server architecture, isolating monitoring (Prometheus, Loki, Metabase) to remove single points of failure.
- Set up a staging-first deployment pipeline and custom Grafana dashboards for real-time observability.
- Secured cloud storage with signed URLs and linked VPS services through Cloudflare Tunnels (Zero Trust).
- **Technologies:** Prometheus, Loki, Grafana, Metabase, Cloudflare, VPS, DNS, Cloud Storage.

Software Engineer

(Codify Company | Part-time | September 2025 – February 2026)

- Developed full stack features for a high-concurrency platform with many active users.
- Resolved production incidents and optimized critical endpoints, improving response times.
- **Technologies:** React, Next.js, NestJS, Prisma, PostgreSQL, Docker, Coolify, AWS.

Research Assistant

(ITBA | Part-time | October 2024 – September 2025)

- Built a robot integrating electronics and control systems.
- Implemented its electronics: battery, motors, and control system.
- **Technologies:** Python, Signal Processing.

Forward Deployed Engineer

(Galo AI | Full-time | April 2026 – July 2026)

- Built and deployed production AI agent workflows with validations, retries, and guardrails.
- Implemented RAG systems and structured outputs with tool calling and dynamic JSON schemas.
- Created LLM evaluation and regression pipelines to reduce hallucinations.
- **Technologies:** Python, SQL, OpenAI/Anthropic APIs, RAG, Prompt Engineering, LLM Ops.

Full-stack Developer

(ITBA Rocketry Team | Contract | August 2025 – September 2025)

- Built internal tools and web apps for the team, focused on frontend.
- Developed the team's landing page.
- **Technologies:** Next.js, React.

AI Software Engineer

(Push&Pop Growth | Freelance | March 2025 – August 2025)

- Built AI agents with Google ADK, integrated with WhatsApp and Telegram.
- Developed REST services with FastAPI and PostgreSQL, deployed on Azure.
- **Technologies:** Python, FastAPI, Google ADK, PostgreSQL, WhatsApp API, Telegram API, Azure.

ACADEMIC PROJECTS & ACTIVITIES

Buenos Aires Institute of Technology (ITBA) – Computer Engineering | 2022 – Present
Applied Software Development Courses (Udemy) – NestJS, Next.js, React, Docker | 2025 – Present
Technical Secondary School No. 7 "T.R.Q." (IMPA) – Aeronautical Technician | 2015 – 2021
Digital Business Course (Udemy) – Sales and Customer Management | Oct 2023 – Dec 2023

INTERESTS & HOBBIES

Football Player • Miniature Trains • Applied Physics (Relativity & Electromagnetism)

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, Java, C, C#, HTML, CSS
Frontend & Mobile: React, Next.js, iOS Development, React Native
Backend: Node.js (Express, NestJS), FastAPI, Django, Java Spring Boot
Databases: PostgreSQL, MySQL, MongoDB, SQLite3, Prisma (ORM)
Cloud, DevOps & Tools: AWS, Azure, Docker, Git, GitHub, Maven
Testing & QA: Automated Testing (Unit, Integration, E2E), Jest, Cypress
Hardware: Arduino, ESP32, Raspberry Pi

LANGUAGES

Spanish: C2 (Native) **English:** C1 (Advanced) **German:** B1 (Intermediate) **French:** A1 (Basic)
